

Regarding major project of Inventor, do follow the instructions as stated below:

- Understand each drawing and its dimensions
- Any dimensions if missing, assume it
- Generate part models with proper rendering using Autodesk Inventor
- Generate parts considering Design for Manufacturing steps
- Develop an assembly in Autodesk Inventor with proper constraints
- Develop drafting for each parts with necessary dimensions and tolerances
- Drafting to be generated with required views (Minimum one 2D view is compulsory and Isometric view is compulsory)
- Generate Balloons and Bill of Materials with proper title block and frame in drafting
- Save the file:
 - Candidatefullname_Candidatebatch_Filename.ipt
 - Candidatefullname_Candidatebatch_Filename.iam
 - Candidatefullname_Candidatebatch_Filename.dwg
 - Candidatefullname_Candidatebatch_Filename.pdf
